

Course / Subject Title

Comprehensive study notes

Exam preparation

Institution / programme

Level ■ Field ■ Semester

What's inside

One-paragraph summary of scope: every topic of the course, with definitions, worked examples, diagrams and **exam tips** — plus a fully solved sample exam and a one-page cheat sheet.

Contents

How to use these notes	2
1 Topic title	3
1.1 Core idea	3
2 Solved sample exam	4
Q1 —	4
A Cheat sheet — formulas & numbers	5

How to use these notes

Box legend:

 **Definition** — memorise verbatim.  **Example** — concrete, worked cases.

 **Formula** — formulas you must know.  **Note** — common traps.

 **On the exam** — model answers to likely questions.

CHAPTER 1

Topic title

Short framing paragraph: what this topic is and why it matters.

1.1 Core idea

Definition

Key term — the precise, exam-ready definition.

Formula

$$y = \frac{a + 4b + c}{6} \quad \sigma = \frac{c - a}{6}$$

Example

A fully worked numerical example with the actual arithmetic spelled out.

Note

A common mistake to avoid, stated crisply.

On the exam: model answer

How to answer the likely exam question on this topic, step by step.

CHAPTER 2

Solved sample exam

Question 1 — ...

Model answer.

CHAPTER A

Cheat sheet — formulas & numbers

Topic A

key formula; key number.

Topic B

key formula; key number.
